GENERAL NEWS

EDA – EDSMG

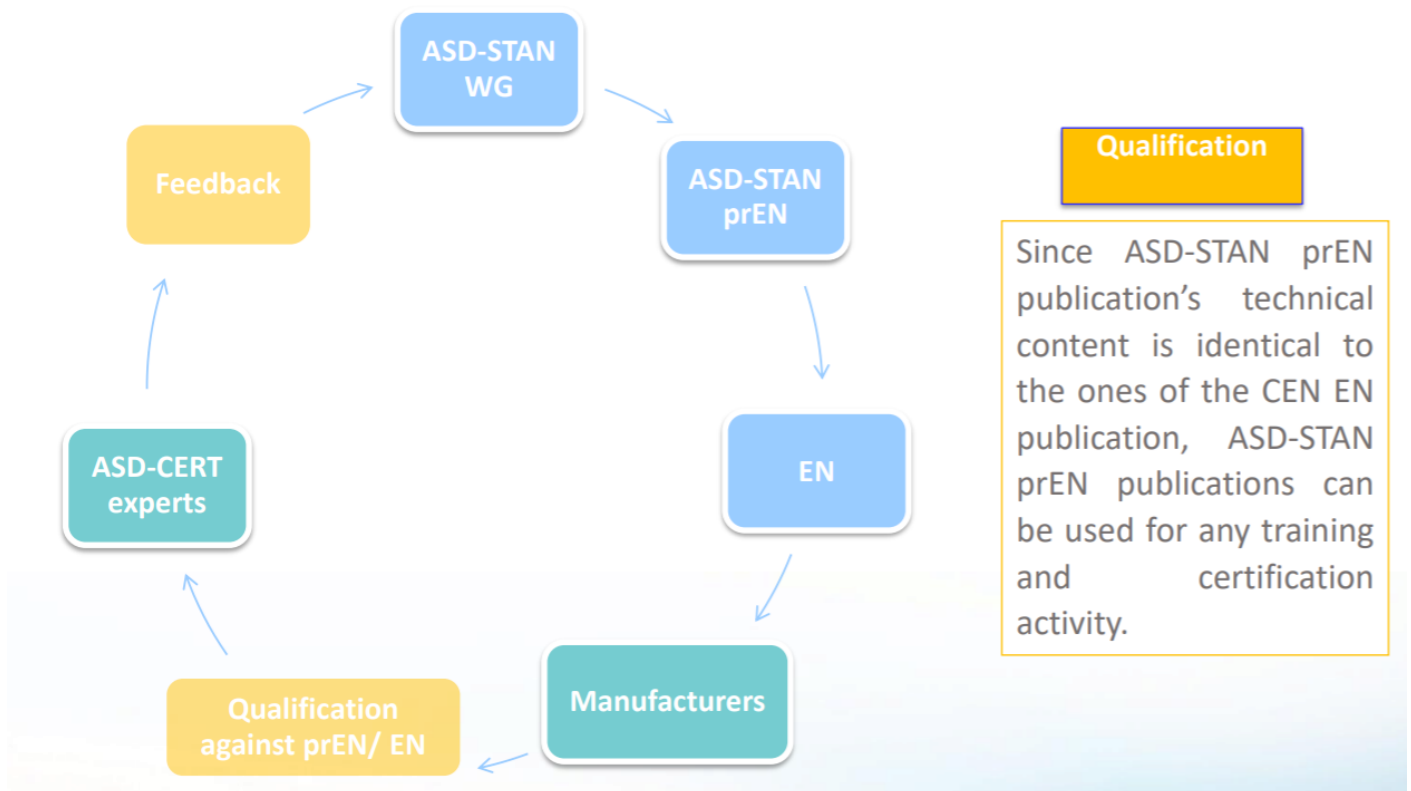

ASD-STAN participated in the second European Defence Standardisation Management Group (EDSMG) meeting, which provided a forum for cooperation, and exchange of ideas among the European Committee for Standardization (CEN), the European Committee for Electrotechnical Standardization (CENELEC), the European Telecommunications Standards Institute (ETSI), EUROCAE, the Organisation de Coopération conjointe en matière d'Armement (OCCAR) and the North Atlantic Treaty Organization (NATO). On this occasion, EDA outlined a proposed roadmap for implementing ASD-STAN - EDA cooperation and described the expected benefits of this cooperation.

ASD-STAN's contribution to the fight against Covid-19

In light of the current situation with the COVID-19, ASD-STAN Working Group “**D12/WG04 Projections, Displays and Lighting**” developed a Technical Report (TR) to provide users with guidance on available methods, physical principles and reasonable and effective practices for the disinfection of surfaces in an aircraft cabin, which is now available in our web-shop. Please [follow this link](#) to access the report TR 4896, Aerospace series — UV radiation for aircraft cabin disinfection.

ASD-STAN cooperation with ASD-CERT

Ensuring the highest quality of standards is among ASD-STAN's top priority, we are working in close cooperation with ASD-CERT to extend certification and qualification activities by reintegrating ASD-CERT auditors' feedback into the revision of standards. To support the revisions needed, ASD-CERT experts will be able to participate in ASD-STAN working groups directly.

As a reminder, we would like to highlight that the product standards (prEN and EN) developed by ASD-STAN are used for qualification activity by ASD-CERT. More information about the qualified product list can be found following this [link](#).
