ASD-STAN is an industrial non-profit association (AISBL) that develops and maintains European standards for the European aerospace & defence industry.

As an associated body to CEN (European Committee for Standardization) we are the main provider of European aerospace Norms (EN).

To enhance the competitiveness of European companies, we established a protocol with CEN to shorten the process of European standardization. ASD-STAN publishes projected-EN standards (ASD-STAN prEN) which are technically identical to the final European Norm (EN).

Our values of openness, transparency, consensus and balance are at the core of our Working Groups. Bringing experts from all across Europe and the industry together, we guarantee the safety of our standards by having Original Equipment Manufacturers (OEMs) and Type Certificate (TC) holders chair our Working Groups.
What we do

- Develop standards related to the design, production and maintenance of aircraft systems, equipment and standard parts
- Manage standardization projects in 10 Domains and 45 Working Groups
- Work in close cooperation with National Standardization Bodies (BNAE, DIN, BSI)
- Contribute to the promotion of European standards at international level
- Cooperate with EDA EDSTAR JMC on the application of civil standards for military purposes
- Act as the European body for the development of global quality aerospace standards by the International Aerospace Quality Group (IAQG)
- Provide trainings (ASD-STD 100 “Simplified Technical English”, REACH, Training on 9100)
Our members include national industrial associations, national standardization bodies, major aerospace companies and public institutions:

- GIFAS – French association
- DIN – German NSB
- ADS – UK association
- TEDAE – Spanish association
- AIAD – Italian association
- SOFF – Swedish association
- ASD
- AIRBUS
- EASA

More information about the involvement in the Aerospace Standardization and its benefits can be found on our web-page “Why and how to be involved?” and on our corporate leaflet.
Cooperation with CEN

- 1986 AECMA-STAN recognized by CEN as an “Associated Body” and “Sole Provider of European Aerospace Standards”
- ASD-STAN is the CEN Technical Committee (TC) for “Aerospace”
- About 2539 currently published European Standards originate from ASD-STAN (16% of the total CEN/CENELEC publications of ENs)
- Currently 560 published ASD-STAN prENs are in progress towards becoming ENs.
- More than 100 direct experts organized in 45 ASD-STAN WGs and 10 Domains
- 69 Technical Reports published by ASD-STAN
- Yearly production (2018): ca. 107 ASD-STAN prENs and 125 ENs
  (2019): ca. 42 ASD-STAN prENs and 170 ENs
Our Main Projects:

- **EN 4179** — Qualification and approval of personnel for non-destructive testing
- **EN 9100 series** deriving from the International Aerospace Quality Group (IAQG)
- **EN 6114 and 6115** — Bolts and Inch series
- **EN 4709 series** — UAS product requirements, CE marking and operating rules for the Open category (harmonized standards)
- **DOA** — Design Organization Approval standards
- **LOTAR series** — Long Term Archiving and Retrieval of digital technical product data
- **9300 series**
- **REACH compatible standards**-new 7000 series
Current & Future Strategic projects

- Cybersecurity
- REACH compatible Standards
- Unmanned Aircraft Systems (EC standardization request, EASA specification on open category UAS)
- Additive Manufacturing
- Digitalization of standards
- Batteries
10 domains of activity

1. Program Management & System Engineering
2. Electrical
3. Mechanical
4. Material
5. Autonomous Flying
6. Quality & Safety Management
7. Digital Projects
8. Propulsion Systems
9. Environment
10. Cabin

Deliverables

ASD-STAN prEN

The ASD-STAN prEN (projected European Norm) is an early publication of the CEN EN. The CEN EN is a later publication of the ASD-STAN prEN with a CEN coversheet.

ASD-STAN prENs are technically identical (with exactly the same content) to the further EN publications by CEN members.

All the European Standards (EN) in the range between 2000-9999 are originating from ASD-STAN.

ASD-STAN prEN publications can be used for any training and/or certification activity!

Technical Report (TR)

An informative document that provides information on the technical content of standardization work.

A TR can be published in the following cases:

• The subject to be covered by the TR is still under technical development requiring wider exposure but needs to be laid down at its current status for further development;

• Informative publication containing collected data of a different kind, which currently cannot be published as European Standard (EN).

• A TR may include, for example, data obtained from a survey carried out among members, data on work in other organizations, or data on the “state-of-the-art” in relation to national standards on a particular subject.

ASD-STAN TR is not transformed into CEN TR and is part of the 5 years periodic review.
ASD-STAN prEN Process

NEW WORK PROPOSAL

NWP Assessment ➔ NWP Ballot ➔ Consensus Draft ➔ Editing 1 ➔ CEN Enquiry ➔ Results of Ballots ➔ Editing 2 ➔ Approval for publication

3 Months

NDB

Disposition of comments + incorporate in final text

ASD-STAN prEN STANDARD

Development & publication time is 8 to 17 months.
ASD-STAN Transforming Process

Development & publication time is at least 14 months.

No technical change is accepted during ASD-STAN prEN transformation into EN.
ASD-STAN Technical Report (TR) process

NEW WORK PROPOSAL

NWP Assessment → NWP Ballot → Consensus Draft → NDB → Results of Ballot → Editing → Approval for publication

1 Month → 1 Month

Disposition of comments + incorporate in final text

ASD-STAN TR

Development & publication time is minimum 6 months.
